## OUR STORY

SAGAON IT SOLUTION is driven by a commitment to exceptional service and comprehensive IT management. With a dedicated team at the helm, we take pride in promptly addressing any minor issues, ensuring uninterrupted operations regardless of time or location.

Leveraging our expertise and proactive approach, we provide holistic solutions that resolve challenges and empower businesses to focus on their core objectives. By entrusting your IT needs to us, you can navigate the technological landscape with confidence, knowing that your systems are in capable hands.

## EXPERIENCED LEADERSHIP

At our company, we pride ourselves on our experienced leadership team. With years of industry knowledge and expertise, our leaders bring a wealth of insights and strategic guidance to the table. Their extensive backgrounds and proven track records enable us to make informed decisions, navigate challenges, and drive the company forward.

Leading by example, our leadership fosters a culture of innovation, collaboration, and continuous growth. Through their vision and guidance, we are well-positioned to adapt to evolving market dynamics, deliver exceptional results, and exceed the expectations of our customers and stakeholders.

# WHAT DO WE DO?

## Anti Drone Defense Air Shield

With the increasing prevalence of drones across various industries, the need for effective drone detection systems becomes imperative to counter potential threats, including attacks on critical national infrastructure.

Deploying an advanced anti-drone system is crucial to ensure safety and security. These systems are equipped with the capability to accurately classify unknown targets, generate alerts, and operate without disrupting non-target airborne assets, utilizing specific jammer bandwidth and advanced directional antennas.

## Vapor Recovery System

As we approach the depletion of oil reserves, it becomes crucial to invest heavily in the development of new energy resources. However, the absence of clear safety measures poses a challenge. Notably, the evaporation and loss of gasoline during car refueling alone accounts for an annual loss of \$10 billion.

According to a survey conducted by the Automobile Pollution Research Institute, 0.74 grams of gasoline evaporate per liter during refueling, primarily due to the pressure in the fuel tank. Installing gasoline recovery devices at gas stations could potentially recover around 90 percent of this lost gasoline, mitigating both financial and environmental impacts.

## Fiber Optic Cable Installation

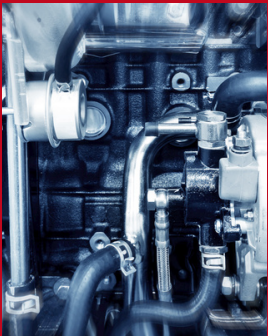

A secure office environment is essential for smooth and uninterrupted operations, particularly when utilizing electronics and internet connectivity. It is crucial to have reliable and well-maintained cables and internet connections to avoid any potential issues or downtime.

Neglecting proper cable management and opting for inexpensive products can result in failures, inconvenience, and even fire hazards. At our company, we offer comprehensive solutions that address all these concerns, providing a safe and efficient office setup for optimal performance and peace of mind.

## Full Customer Experience Service

At SAGAON IT SOLUTION, we are committed to delivering exceptional service and managing all of your IT needs. Our dedicated team is always ready to address any minor issues promptly, ensuring smooth operations anytime and anywhere.

With our expertise and proactive approach, we strive to provide comprehensive solutions and resolve any challenges that may arise, allowing you to focus on your core business with confidence.
